## Projects:

### 1. CodeMate

- **CodeMate** is a platform where developers can connect, share their work, and grow together. It lets users create profiles, post updates, chat in real-time, and discover other like-minded developers—all in one simple and friendly space.

- Tech: MongoDB, React, Node, Express
- GitHub: <https://github.com/krrishaggarwal/CodeMate>

### 2. TO DO List

- Static To Do List allows user to save their tasks and help them to know which task is pending

- Tech: HTML, CSS, JavaScript
- GitHub: <https://github.com/krrishaggarwal/To-do-List>
- Live: <https://krrishaggarwal.github.io/To-do-List/>

### 3. Random Number Guessing Game

- User have to Guess the number between some range of Numbers

If user guessed it correct he/she wins else loses

- Tech: HTML, CSS, JavaScript
- GitHub: <https://github.com/krrishaggarwal/RandomNoGame>
- Live: <https://krrishaggarwal.github.io/RandomNoGame/>
